

## Make it Personal - Crafty Version

*As you settle into your Journal Magic, there are endless personal touches you can make to turn it into your own enchanted moon book.*

*Here are some suggestions for starting out.*

# 1

### Round the Corners

My personal favorite thing to do each year is to put on some chill music and just trim the corners of my new journal. If memory serves, it takes about 10-20 minutes. Putting in the time at the very start of my Dreamfruit journey gives me incredible satisfaction all year long.

**Supplies to Gather:** corner rounder, the latest Dreamfruit playlist (found on my Spotify page)

# 2

### Hello Moon

The inside front cover of your Dreamfruit Journal is a magical place. This is the perfect place to start defining what your journal is about for you, and what your intentions are going into it. You can use stencils to inscribe your name, call forth an archetype to accompany or aid in your journal magic, collage a vision for the year ahead, or create a blessing or prayer for your lunar journey.

**Supplies to Gather:** letter stencil, gold pen, glue stick, scissors, pretty papers

# 3

### Tabs!

Your Dreamfruit Journal has thirteen lunar sections of about ten pages each. As your journey unfolds, you'll be so glad to have tabs to mark each section so that you can easily refer back or leave notes for future moons. You can do this with colored paper and write the name or dates for each moon on the folded edge of both sides.

**pro-tip:** *It can be fun to graduate the tabs by color (make a rainbow!) and stagger their position along the edge so they cascade month to month.*

**Supplies to Gather:** letter stencil, gold pen, glue stick, scissors, pretty papers

## Stickers!

# 4

Did you get a sticker sheet with your Dreamfruit Journal? This sheet has a sticker for each of this year's Dreamfruit Moons, including monthly themes and dates for each quarter moon. You can pre-load your magical moon book by placing them into the moon wheels for the year.

**Supplies to Gather:** your Journal Magic for Earthlings, annual Dreamfruit moon sticker sheet

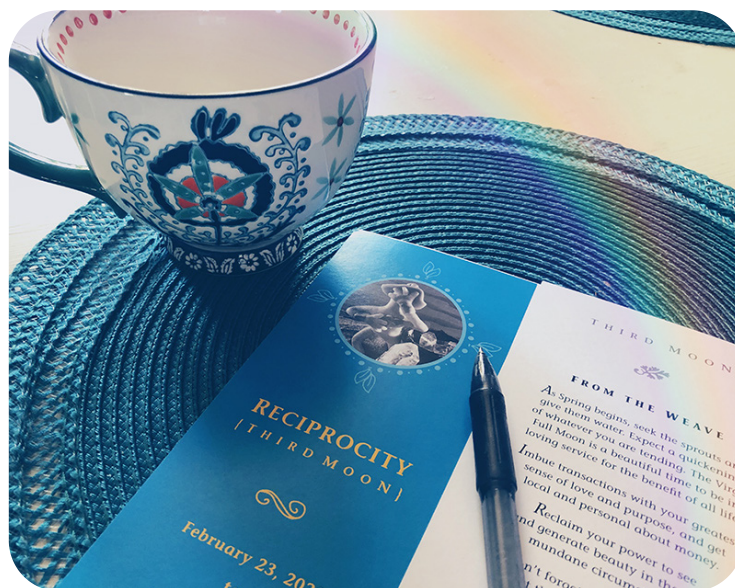

## Lunar Tales for Earthlings

# 5

If you're playing with this year's book of Dreamfruit Lunar Tales as well, go for it with the bonus journal art cards in the back of book. These are designed to be torn out and fit perfectly onto the opening page of each lunar section. Transfer all thirteen pullout cards into your new journal (along with the Dreamfruit moon stickers) to transform it into a dated moon book for the year ahead.

**Supplies to Gather:** scissors, your copy of this year's Lunar Tales for Earthlings, glue stick, washi tape

*Of course, you'll have your own ways of enjoying Dreamfruit, and we'd love to hear about them! Visit the [Dreamfruit Travelers Facebook Group](#) to share what's inspiring you along the way.*
